

Researcher positions

Researcher/research assistant positions are immediately available in the Laboratory for Brain and Machine Intelligence, led by Sang Wan Lee, at KAIST (<http://aibrain.kaist.ac.kr>).

Our laboratory is affiliated with

- the department of bio and brain engineering,
- the brain and cognitive engineering program,
- KAIST Institute for Artificial Intelligence (KI AI), and
- KAIST Institute for Health Science and Technology (KI HST).

Research topics

- machine learning and brain-inspired AI
- Deep reinforcement learning algorithm implementation

Benefits

- a salary plus benefits (negotiable)
- provide computer resources, such as a stand-alone GPU (if necessary), a GPU server, and the 128-core InfiniBand-based high performance computing cluster exclusively owned by our laboratory.
- provide opportunities for working with our collaborators (refer to our website for more information).

Qualifications

- BS or MS degree in CS, EE, or related fields
- Programming skill (Matlab, Python, or similar)

How to apply :

Interested please send your **CV** and **transcript** to sangwan@kaist.ac.kr. Applications will be reviewed on a rolling basis.
